

Dear Alejandro

I have attached an option agreement for the toroidal transformers. It is basically a free six-month option (though you would end us an update at the end of your option period). It has the opportunity to extend the option for an additional 6 months for a fee if you were not ready to sign a license at that point. (This is in section 5).

My thought is that this would allow you to say that you have a legal right to the technology to your potential partners (including at the conference) without having to take a license right now. What do you think? If you have any questions or concerns about particular sections, I am happy to discuss with you.

Best regards,
-Chris
